Successful project: TIE ascention gmbh

The initial situation/challenge: Better project planning and timely action

TIE ascention gmbh previously used a self-developed project accounting and time recording system. Today myPARM has taken over that time-consuming and intricate work, which has now become very easy to understand and very efficient. The exact project planning and recording of real-time project statuses provides a "time to market" view of all projects, thus allowing simpler and more profitable implementation of the projects.

The solution: Key figures are always up-to-date and instantly available thanks to the use of myPARM in combination with Cognos

myPARM is a web-based solution whose key figures are always up-to-date and can be inserted instantly. For faster detection and successful control of project risks, the company uses myPARM together with Cognos solutions. These combined tools permit successful control of its risk management.

The success story: More effective and predictable project performance, streamlined business procedures, cost and time savings

Problems and bottlenecks can be recognised at an early stage so that the most successful and timely action can be taken. Project cost and time savings have improved since the company has used myPARM, which allows projects, resources, costs and budgets to be efficiently managed. The new solution has led to more effective and predictable project performance, streamlined business procedures and improved cost control across the entire company.

About TIE ascention gmbh

TIE ascention gmbh is a consultancy and software house focusing on front-end and data management with locations in Germany, Austria and Switzerland. Its consultants design and implement cross-sector solutions in the sectors of business intelligence, controlling and data warehousing according to customer requirements. Preconfigured business and process components are used in combination to speed up implementation and guarantee quality standards. There are more than 30 users of the myPARM solution at TIE ascention gmbh.

Peter Smoly
Chief Executive Officer
TIE ascension gmbh

Statement of the customer:

«We can now complete our monthly project closures immediately after the end of each month. Thanks to myPARM, our operational and financial perspectives have been brought into line, which allows timely action.»
