Successful project: ISS Suomi Oy

The initial situation/challenge: Maintaining company-wide cost control

The ISS Group (525,000 employees worldwide) uses SAP as a central management system. A specialised tool is also used to meet the specific requirements of the project services quickly and efficiently. The corporate controlling specifications must also be considered. The ISS Group intends to remain competitive and respond effectively to diverse economic challenges with an efficient software solution.

The solution: Implementing the powerful project management tool myPARM into the existing SAP environment

With the implementation of myPARM, the ISS Group now has a powerful tool for managing its daily business successfully, so that it can keep pace with the competition over the long term. The seamless integration of myPARM into the existing SAP environment was mandatory. myPARM can meet all the Group's requirements, taking full account of its controlling specifications.

The success story: To be and stay powerful and competitive on a sustained basis thanks to effective project control

The ISS Group provides a wide range of service solutions to its customers, extending from individual to integrated facility services (IFS). All services are coordinated by the ISS Partner Group. The myPARM solution was introduced to successfully manage a diverse range of complex service projects. This powerful tool helps the ISS Group to remain competitive and successful over the long term. This is achieved by ensuring that the projects can be controlled at all times and by implementing effective project control. myPARM is widely used throughout the ISS Group by a large number of project managers for online follow-up and handling project invoices.

About the ISS Group

The ISS Group, founded 1901 in Denmark, is a leading provider of facility services worldwide. The company is active in more than 50 countries and is the fourth largest private employer in the world, with 525,000 employees. In the course of its history, ISS has developed from a single-service to a multi-service provider. Thanks to its experience in a wide range of business sectors, ISS offers industry and customer-specific solutions.

ISS Suomi Oy

Statement of the customer:

«The main benefit of myPARM: the project accounting information is located in a database. The project overview offers simple data access to project managers. All users can access their real-time data according to their roles. The interface with SAP eliminates overlaps between receivable and payable accounts. Thanks to the development work together with parm ag and EmCe, we were able to enjoy all the benefits of myPARM.»
