Successful project: Widmer Ingenieure AG

The initial situation/challenge: Creating a new engineering company and looking for a suitable project management solution

Christoph Widmer ventured to take the step to independence after many years as branch manager of a major engineering services provider. During that time, he was able to gain very good experience with the myPARM project management solution, which was in successful use across the company. The flexible adaptation of myPARM to specific customer requests made Mr. Widmer decide to use this solution in his own company. Thanks to the high coordination of the system to the needs of his small engineering company, success was not long in coming.

The solution: Implementation of the myPARM project management software

myPARM was familiar to the management of his former employer, and the engineering company could rely completely on this solution. Its implementation was uncomplicated and it could be used successfully within a very short time. Moreover, training of the employees was unproblematic. Thanks to the successful implementation of the project and continuing support to this day, the management could concentrate on its strategic objectives and myPARM was able to lead the company to success.

The success story: Faster and more efficient controlling

Since the introduction of myPARM, Widmer Ingenieure AG has been able to save costs and time. Thanks to the disciplined completion of the timesheets, there is no loss of chargeable working hours and consequently no loss of earnings. Managing and controlling working hours has proved to be efficient and quick to implement. myPARM provides fast and expressive standard evaluations. Controlling has become faster and more efficient thanks to myPARM. For a small engineering company – such as Widmer Ingenieure AG – the main benefits of myPARM are that it can be used easily, straightforwardly and without major expenditures.

About Widmer Ingenieure AG

Widmer Ingenieure AG is a small and modern engineering company (civil engineering services). Its activities include road and railway construction, underground construction, municipal projects, hydropower plants, construction and planning services, building maintenance, and canal management. Widmer Ingenieure AG employs 15 myPARM users.

Christoph Widmer
Chief Executive Officer
Widmer Ingenieure AG

Statement of the customer:

«The major benefit is that the system is tailored to meet our engineering needs. It can be used by everyone, at every employee level, whether by project managers or by directors applying its principles. myPARM is easy and straightforward to use. We are happy with its philosophy, which is specifically dovetailed to the needs of a planning company. It is evident that myPARM has been developed with service providers in mind.»
