

The multiple award-winning, market leading and industry independent PRINCE2 project management solution

The process-driven myPARM PRINCE2 Edition fully supports your project business according to PRINCE2 methodology, thus ensuring projects with...

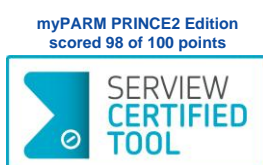

- ... controlled start, controlled stage boundaries and controlled end
- ... focus on business justification and risk
- ... a defined organizational structure
- ... decision points for flexible interactions
- ... regular, scheduled checks of progress
- ... possibility for corrections by management when not in line with plan (exception handling)
- ... commitment of management and stakeholders at the right time and for the right topics
- ... good communication channels between steering committee, project team and other stakeholders
- ... provision / creation of the 26 management products such as PID, Business Case etc. These are either completely integrated into the system and/or available by preconfigured templates.

Further functional range:

- | | | |
|-----------------------------|---------------------------------|--|
| ✓ Starting up a project | ✓ Project and process tailoring | ✓ Gantt / WBS |
| ✓ Initiating a project | ✓ Projekt templates | ✓ Invoicing |
| ✓ Directing a project | ✓ Workflow management | ✓ Budgeting |
| ✓ Controlling a stage | ✓ Dashboards | ✓ Time and expenses recording |
| ✓ Managing stage boundaries | ✓ Custom reports | ✓ Notification and alarm functions |
| ✓ Managing product delivery | ✓ Risk register | ✓ Support of mobile devices |
| ✓ Closing a project | ✓ Quality register | ✓ Export to Office formats (Excel, PowerPoint, Word), CSV, PDF, XML, TIFF... |
| | ✓ Issue register | |
| | ✓ Lessons learned log | |
| | ✓ Daily log | |

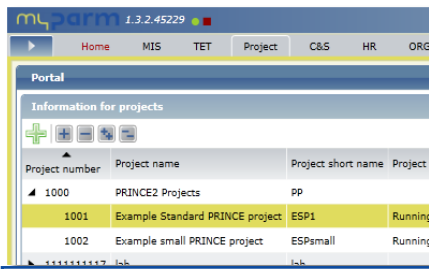

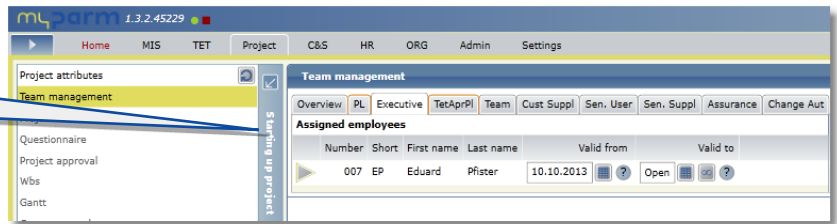

Your benefits:

- Easy integration into existing IT infrastructure due to more than 30 standard interfaces
- International usage by various legal entities (multi-tenancy / multi-currency)
- Very short implementation time.
Pre-configured best practice solutions by industry and preferred project methodology enables us to provide our software in live operation in just 1 week after ordering.
- Minimal training requirements through intuitive user interface and optimised user guidance
- Web-based application, available in the cloud or on-premise (local) both for rental as well as for one-time purchase
- High investment security.
Risk and cost reduction through customisation capabilities of the system (processes, additional fields, reports, graphs, dashboards) without the need of programming.

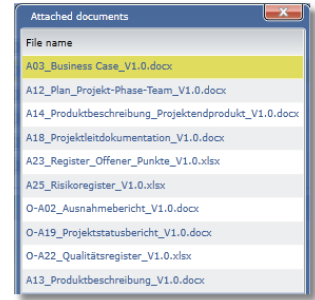

«An insight into our solution»

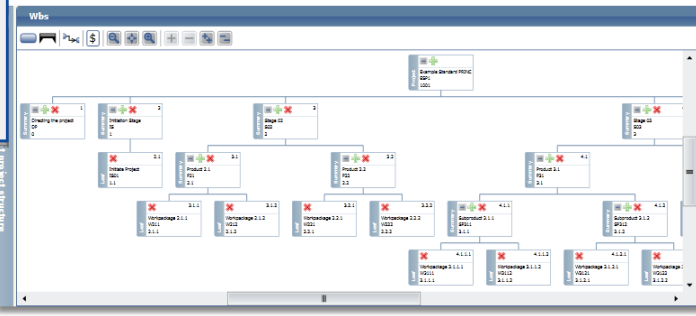

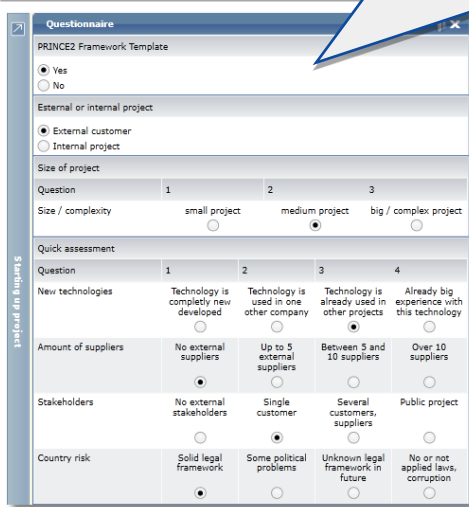

During process “Starting up a project” you define your project team.

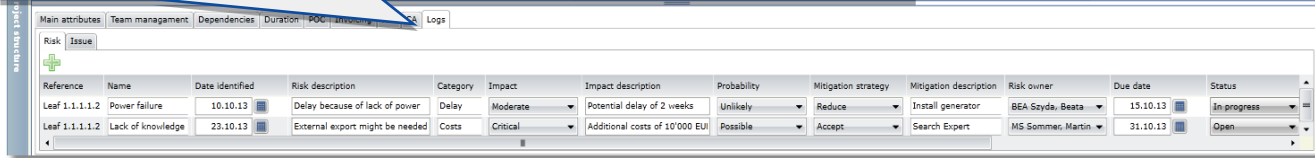

Revision-safe archiving of PRINCE2 – Products and plans (documents) in myPArM ECM.

By answering the questionnaire during „Starting up project”, the necessary processes and documents, and the project structure are automatically adapted to the requirements of the project. Due to this scaling an excessive “bureaucracy” is avoided.

Keep risks and issues, as well as the measures planned under control. The existing data on all elements of the project logs/registers (risk, issue, quality, daily, lessons learned) will help you.

Further information

Do you have further questions or would you like to have more information about applying?

Mr. Epple will gladly give you personal advice and further information.
